

Conditions for participation in the NI BVD Programme to facilitate administration.

- Tag details will be passed to the AHWNI database. Details on purchase request forms may be shared with AHWNI to assist with the resolution of queries.
- Herd details as stored by DAERA will be accessed and uploaded to the AHWNI database.
- AHWNI and approved laboratories may view information on individual animals in your herd for resolution of test queries. (This information would include current herd list, details of herds moved to and from, animal dates of birth and dates of death.)
- The testing laboratory will transfer results to the database, including the results of any repeat or relevant follow up BVD testing carried out by your private veterinary surgeon during the voluntary and compulsory phases of the BVD programme and may share details of submission forms with AHWNI to assist with the resolution of queries.
- Results on the database will be used and shared for the administration of the BVD programme.
- Results will be shared with the veterinary practice currently granted access to your herd information on NIFAIS to access your BVD results. If you would prefer a different practice to receive your BVD results, please nominate them below.

Name of Herd Keeper:	
Herd Number:	
Business ID:	
Mobile number (to which results may be sent):	
Nominated veterinary practice name and address (if different to the practice currently granted access to your herd information on NIFAIS):	
E-mail address:	
Signed:	
Date:	

All personal information you supply to AHWNI will be processed solely for the purpose for which it has been provided as outlined above.
